

Benefits & Advantages Of Pumping On-Lot Sewage Disposal Systems

Why is it SO Important to have your system Pumped?

- Provides clean drinking water.
- Removes accumulated solids in treatment tank.
- Prevents solids from traveling out of the tank and damaging the drainfield.
- Allows natural treatment process in the tank to work as intended.
- Registered inspections by a qualified hauler can help catch many small problems before they become big (and expensive) problems.
- A registered inspection can also help alert you to different or additional maintenance activities which could help prolong the life of your sewage system.
- Property owners with properly maintained systems save money by ensuring the longevity of the system and protect the public health and environment by preventing the spread of infection and disease and protecting water resources.
